

Panacea® Advanced Replacement Membrane Cell Gaskets

For *DD175® Electrolyzer Technology

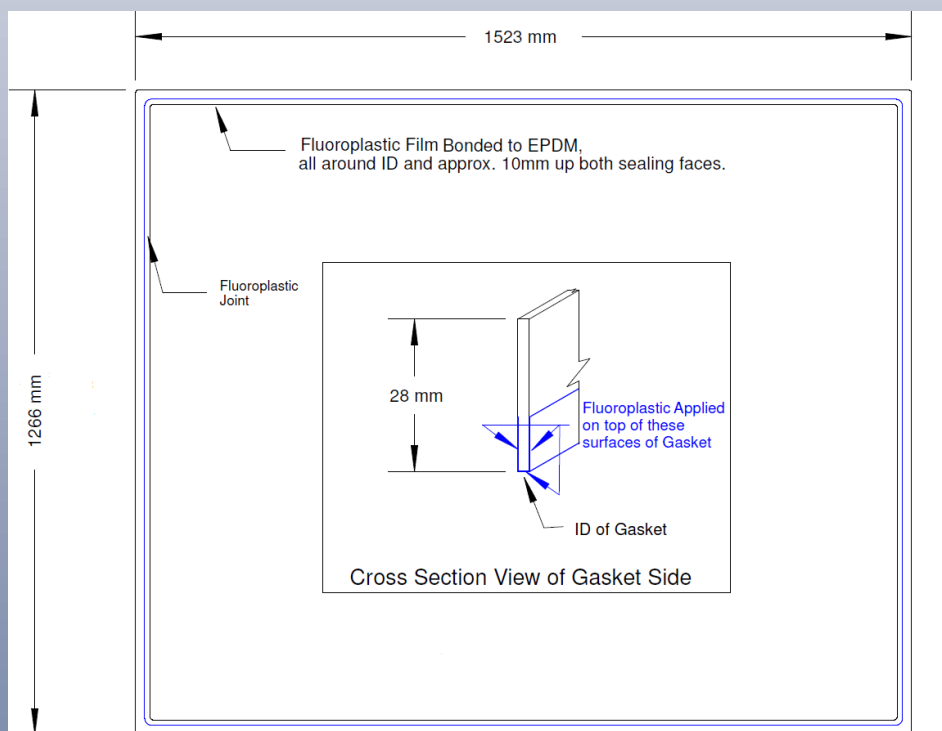

Made from Prince Panacea® High Performance 6962 Special EPDM

Shore A Hardness 65 ± 5

6962 Special EPDM has advancements including:

- Being compounded without the use of Calcium or Magnesium as ingredients so as to not unduly harm membranes.
- *Excellent* chemical resistance and compression set (long-term sealing ability)
- Heat resistance

Armored Anode Frame Gasket Photos

- * **Anode Gaskets** have:
 - Bonded Fluoroplastic Shield on I.D. extending up both sealing faces
 - There is only one overlapped fluoroplastic seam – midway on one lengthwise side of the gasket.

* **Cathode Gaskets**, unarmored, are also available.
