

Replacement BICHLOR® Discharge Tube Gaskets

PANACEA® 6962 Special EPDM with Optional PTFE Armor

- **Nominal ID/OD: 40/65 mm**
- Prince Panacea® 6962 Special EPDM offers excellent long-term sealing ability and corrosion-resistance.
 - **PANACEA® gasket life regularly achieves the life of the electrolyzer membrane, even without Teflon® armor, for users globally.**
- Per the photos, a variety of gasket thicknesses, along with armoring options (including with molded easy-to-seal ribs) are available.

Gasket Suggested Torque Specs:

- $\leq 110 \text{ N}^*\text{m}$, for the above gasket on the right.
- Easy-to-seal ribs lower the bolt torque required to make a reliable seal, thus sealing with much less than $100 \text{ N}^*\text{m}$.
- Specific torque suggested is dependent on gasket version used, and condition of discharge tube nut assembly. Please consult Prince for details.
